Wayne Township
S.R. 0288, Section L09
MPMS/ECMS No. 29557
Culvert Rehabilitation Project

Dear Ms. Baney:

We would like to take this opportunity to inform you that the Pennsylvania Department of Transportation is planning to rehabilitate the existing culvert which carries PA 288 over Beaver River Tributary in Wayne Township, Lawrence County. The project is located near the intersection of PA 288 and Township Road 321 (Jockey Moore Road), approximately 1 mile northwest of Ellwood City, Pennsylvania. Please see the attached location map. We anticipate construction to occur between March 1, 2011 and August 24, 2011.

The project consists of the rehabilitation of the existing concrete box culvert with a polyethylene (plastic) pipe liner (concrete reinforced) and replacement of the existing concrete pipe extension and other miscellaneous work.

During construction, we plan to maintain all lanes of traffic on PA 288. There will be intermittent short-term lane restrictions to allow the contractor to access the site during construction. The contractor will not be permitted to restrict traffic from 6 A.M. to 9 A.M. and 3 P.M. to 6 P.M. Monday through Friday and during non-working hours. All physical work will be off the roadway which will minimize the inconvenience to the motoring public and businesses along the corridor.

We would ask that this information concerning the project be forwarded to your emergency services contacts and any other persons or entities within your community who may be impacted by the project.

If you should require additional information, please contact Mr. Erik M. Porter, P.E., Project Manager, at (412) 429-4869 or me at (412) 429-5005.

Sincerely yours,
PENNDOT District 11

Cheryl Moon-Sirianni, P.E.
Assistant District Executive
